 [Bold Profile](#)

Full Stack Developer with 3+ years of experience building scalable web applications using React.js, Next.js, Node.js, and NestJS with microservices architecture. Strong in developing high-performance REST and gRPC APIs, improving response times and system efficiency. Experienced with RabbitMQ, multi-database systems (SQL & NoSQL), and third-party integrations. Skilled in implementing secure authentication and deploying reliable, production-ready applications. Proficient in monitoring and maintaining distributed systems for performance and stability.

Skills

Frontend: React.js, HTML5, CSS3, TailwindCSS.

Backend: NestJS, Node.js, Express.js, TypeScript, Redis.

Microservices: gRPC, RabbitMQ, Redis pub/sub.

Databases: MongoDB, PostgreSQL, MySQL.

Tools & Integrations: New Relic, Shopify APIs, Amazon Cognito, BigRock.

Work History

2025-08 - Current

MERN Stack Developer

J Pencil Private Ltd, Coimbatore, India

- Led development and enhancements for Version 3, improving platform stability, scalability, and overall user experience, while collaborating with cross-functional teams to deliver features, and resolve production issues.
- Built a full-stack theme builder using Next.js and NestJS/Express with MySQL, enabling real-time UI customization and smoother workflows, and contributed to improving CI/CD processes.

2024-04 - 2025-08

Backend Developer

Ezio Solutions Private Ltd, Coimbatore, India

- Developed and integrated RESTful and GraphQL APIs using Node.js, NestJS, and Express, supporting seamless data flow across React.js and Next.js

applications, including third-party integrations.

- Built and consumed APIs while optimizing SQL queries and data handling, improving performance and reliability across full-stack applications.

2023-06 - 2024-03

Junior BackEnd Developer

HASHh IoT Labs Private Limited, Udumalpet

- Streamlined API integration for seamless communication between the frontend, backend, and IoT devices, ensuring reliable data flow across the system.
- Developed server-side logic using Node.js microservices with RabbitMQ, while building and supporting backend systems for React-based applications, and actively contributing to agile ceremonies and team discussions.

2021-11 - 2023-01

Freelancer

Freelace, Coimbatore, India

- Delivered high-quality work within deadlines, adapting quickly to changing requirements, and consistently meeting client expectations.
- Built customized solutions based on client needs, maintaining clear communication, and strong relationships that led to repeat work and positive feedback.

Education

2021-04

Master of Science: Computer Science

Sri Subash College of Arts And Science - Pollachi, India

Projects

jwelry.ai

- **Technology Stack:** Next.js, Tailwind CSS, Node.js, NestJs, RabbitMQTT, redis pub/sub, MySQL.
- Its enabling dynamic site creation with real-time theme customization. Designed scalable REST APIs and modular UI components like sliders, banners, and collage layouts for enhanced user experience.

CryptoLenz

- **Technology Stack:** React.js, Tailwind CSS, TypeScript, Express.js, MySQL.
- CryptoLenz empowers investors with essential data resources for in-depth cryptocurrency research. Formerly CryptoBuddy, it serves as a premier crypto information aggregator, helping users discover early-stage investment opportunities.

OPX- Internal App

- **Technology Stack:** Next.js, NestJS, Tailwind CSS, PostgreSQL.
- Developed an internal healthcare app to manage patient calls, referrals, and appointment reminders. Handled both incoming and outgoing

communication workflows to streamline patient coordination.

OPX- Referral App

- **Technology Stack:** Next.js, Node.js, Express.js, Tailwind CSS, MongoDB.
- The Application streamlines patient referrals with Super Admin, Admin, and Referral Coordinator roles, ensuring efficient control and coordination. It enables chat between coordinators, manages referrals, and sends instant notifications for new referrals and messages.

Clustervise

- **Technology Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB
- Clustervise uses Open AI to identify electrical components for RFQs and generates an automated Bill of Materials (BOM) for AC/DC components. Smart Calculations & Phase Balancing: It performs AC/DC calculations, balances electrical loads using Lodash, and calculates missing current values based on voltage and phase.
